grommunio Roadmap

Release 2021.10.08

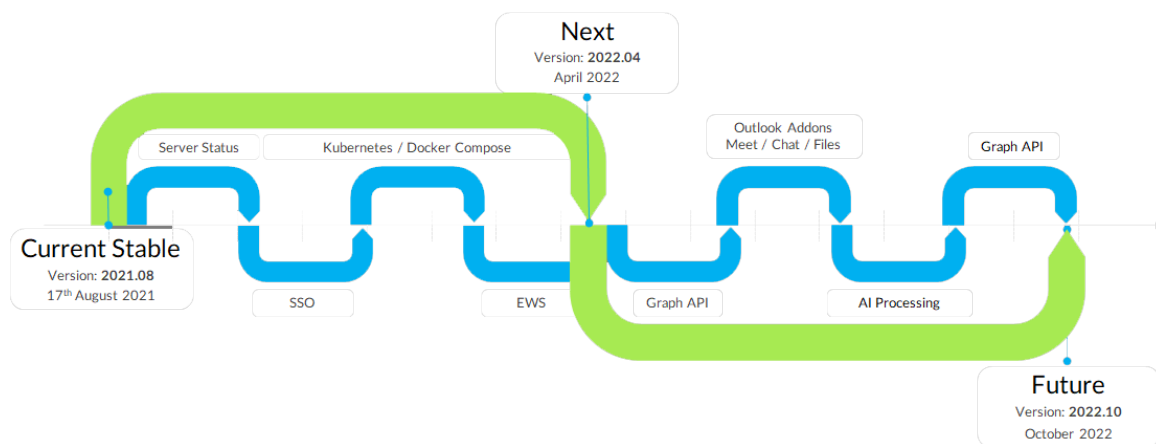

grommunio GmbH

Oct 08, 2021

CONTENTS

1	Current Roadmap	1
1.1	Release strategy	2
1.2	Disclaimer	2
2	Legal Notice	3

CURRENT ROADMAP

- The **Current Stable** stable release of grommunio has been released on the 17th August 2021, with a support lifecycle of 3 years and optional extended lifecycle extensions available with grommunio's subscription program.
- The **Next** stable release is planned for release in April 2022 with the following featureset:
 - The “Server Status” integration alongside the integration of realtime Mobile Devices enables administrators provides administrators a strong management tool for daily operation. (completed, released as update)
 - Integration of SSO technologies for even simpler login and credential management in enterprise networks. (in progress)
 - With Kubernetes and Docker compose recipes, even the most complex installations are made possible in very short time. With the approach of role separation providers of virtually any size are able to scale linearly with grommunio. (in progress, already in production with early adopters)
 - EWS support will provide native access for macOS and Outlook on mobile (App) users as well as allow protocol-level integration next to RPC as main protocol.
- The **Future** release is planned for release in October 2022 with the following featureset:
 - Graph API implementation will allow any third party products to integrate with grommunio on the same level as it would with Microsoft 365-enabled environments.
 - Development of Outlook Addons for grommunio Meet, Chat and Files will integrate all other aspects of enterprise communication directly with Microsoft Outlook
 - With (configurable) enhanced AI processing (on-premise) various metadata analytics to provide data about the communication needs which lead to business relevant data insights over multiple channels.

- grommunio Web 2.0 will deliver the next-generation web experience for clients of any device type.

1.1 Release strategy

grommunio is committed to delivering quality software products in a customer-friendly and predictable way.

The release model of grommunio is divided into 2 different chains:

- Major releases (e.g. 2021.02, 2021.08)
- Minor releases (e.g. 2021.02.1, 2021.02.2, 2021.08.1)

Major releases contain are determined to larger feature-sets as well as including potential architectural changes whereas minor releases are focussed on bugfixes, security updates and smaller features.

1.2 Disclaimer

While grommunio does everything to provide the highest level of transparency, the roadmap document is subject to change based on factors such as customer demand, technological adaption or community response. While this document is crafted with the highest level of care and accuracy, there might be changes, which grommunio communicates through its available communication channels, such as social networks, newsletters and on grommunio's other news sections.
